Feature	Technical Implementation	User Benefit
Ghost Elements	status: "tentative" via WebSocket	Users see AI suggestions in a "dimmed" state before committing them.
Agent Presence	Cursor broadcast as openai-agent	The AI feels like a real teammate moving around the board.
Tool Calling	backend/app/services/canvas_agent.py	The AI can physically move, create, and organize your ideas.
Multi-Modal	Whisper + Higgsfield	Talk to the board and have the AI generate images or text in real-time.

THANK YOU
